

RCP APPROVAL PROCESS

01

RCP submits application with all attachments & signed agreement to Rugged

02

For spray foam system approval, RCP submits documentation showing full compliance with the SPFA worker safety Certification Program

03

Rugged reviews and provides credit limit in accordance with Rugged credit policy

04

Rugged to review application for pre-approval

05

Rugged visits RCP office and three previously completed jobs to review quality and evaluate capabilities

06

Final review and approval by management

07

Rugged sends RCP agreement and certification to RCP

TWO SEPARATE LICENSES

SPF ROOF SYSTEM | COATING RESTORATION SYSTEM

RCP must indicate on the application which classification they are applying for or if they are applying for both. Either classification has a similar process except in order to qualify for the SPF classification, RCP must exhibit proper employee safety training. Rugged recommends Contractor Company Accreditation through the SPFA along with worker certification, documenting equal training is acceptable.
